Education

| | |
|---|------------------------------|
| Dr. Ambedkar Institute of Technology for Divyangjan, Kanpur <i>B.Tech- Computer Science and Engineering (CSE)</i> <ul style="list-style-type: none">CGPA: 8.4/10.0 (First year) | <i>Oct 2023 – May 2027</i> |
| Bakhra inter collage,bakhra(deoria) 12th-Science <ul style="list-style-type: none">Percentage: 81.0/100.0 | <i>Aug 2020 – june 2022</i> |
| S.M.I.G. inter collage,karjaha(deoria) 10th <ul style="list-style-type: none">Percentage: 90.83/100.0 | <i>july 2018 – june 2020</i> |

Experience

| | |
|--|----------------------------|
| Web Development intern <i>Apana Collage</i> <ul style="list-style-type: none">Assisted in coding, testing, and debugging using React for frontend development and MongoDB for database management.Gained hands-on experience with modern frontend,back-end technologies,including RESTful APIs. | <i>Aug 2024 – feb 2025</i> |
|--|----------------------------|

Skills

- **Languages,Frameworks and Database:** Java (DSA in Java), Python, HTML, CSS, JavaScript, TypeScript, React, Next.js, Angular, Node.js, Express.js, mongoDB,PostgreSQL.
- **Core Expertise:** Tailwind CSS, Bootstrap,API Development, JWT Authentication, Payment Integration, AI Integration, Algorithms, Data Structures
- **Tools:** Git, GitHub, VS Code, MongoDB Compass, Postman.

Projects

| | |
|---|---|
| Farmer Crop Advisory <ul style="list-style-type: none">Developed a Farmer Crop Advisory App using the MERN stack, TypeScript, Tailwind CSS, and Gemini AI that provides real-time market prices, weather forecasts, AI-powered soil and crop health insights, and farmer crop data management. Integrated an AI chatbot, multi-language support, and 100+ crop guidance modules. Implemented government scheme recommendations and a feedback system to enhance user engagement. Designed to help farmers make data-driven decisions and improve agricultural productivity. | Tausif289/farmerApp 🔗 |
| Deit Tracking App <ul style="list-style-type: none">Developed a Diet Tracker App using Angular, Node.js, and Express.js to help users monitor and manage their daily nutrition and fitness goals. Implemented features to search and add food and activities, track daily calorie intake and burn, and log meals (breakfast, lunch, dinner) along with water intake and activity. Designed interactive charts for weekly calorie balance, weight gain/loss trends, and nutrition breakdown. Included goal tracking and progress visualization to support personalized health management. | Tausif289/Deit Tracker 🔗 |
| AI career coach <ul style="list-style-type: none">AiCareerCoach is a modern Next.js web app that helps users prepare for interviews and build resumes with AI-powered suggestions. It uses Clerk for secure login, shadcn/ui and Tailwind CSS for a sleek UI, and integrates Gemini AI for smart resume tips and interview question generation. Data is stored in a PostgreSQL database. Perfect for job seekers aiming to boost their career with intelligent tools. | Tausif289/aicareercoach 🔗 |

Achievements

- Solved over 450 coding problems on various competitive programming platforms.
- Professional Certificate in DSA in Java programming language and MERN Full Stack Web development.
- Consistently achieved a CGPA of 8+ in every semester of B.Tech, demonstrating strong academic excellence and a solid foundation in Computer Science and Engineering.
- Ranked among the top 5 students in the district for the Class 10th board examinations, Secured the highest marks in the Class 12th exams at the college level, reflecting strong dedication and academic performance.
